## Week 2 Quiz

week 2 Quiz	
Latest Submission Grade 100%	
1. How do you use Image Augmentation in TensorFLow	1 / 1 point
Using parameters to the ImageDataGenerator	
○ With the keras.augment API	
You have to write a plugin to extend tf.layers	
○ With the tf.augment API	
2. If my training data only has more facing left but I want to closely more facing with the would be reid a confitting?	
2. If my training data only has people facing left, but I want to classify people facing right, how would I avoid overfitting?	1/1 point
Use the 'horizontal_flip' parameter	
Use the 'flip' parameter and set 'horizontal'	
○ Use the 'flip' parameter	
Use the 'flip_vertical' parameter around the Y axis	
3. When training with augmentation, you noticed that the training is a little slower. Why?	1/1 point
Because the training is making more mistakes	
Because the image processing takes cycles	
O Because there is more data to train on	
Because the augmented data is bigger	
○ Correct     That's right!	
4. What does the fill_mode parameter do?	1/1 point
○ There is no fill_mode parameter	
It creates random noise in the image	
It attempts to recreate lost information after a transformation like a shear	

5.	When using Image Augmentation with the ImageDataGenerator, what happens to your raw image data on-disk.	1 / 1 point
	O It gets overwritten, so be sure to make a backup	
	A copy is made and the augmentation is done on the copy	
	Nothing, all augmentation is done in-memory	
	O It gets deleted	
	○ Correct That's right!	
6.	How does Image Augmentation help solve overfitting?	1 / 1 point
	O It slows down the training process	
	It manipulates the training set to generate more scenarios for features in the images	
	O It manipulates the validation set to generate more scenarios for features in the images	
	It automatically fits features to images by finding them through image processing techniques	
7.	When using Image Augmentation my training gets	1 / 1 point
	Slower	
	O Faster	
	O Stays the Same	
	Much Faster	
	✓ Correct That's right!	
8.	Using Image Augmentation effectively simulates having a larger data set for training.	1 / 1 point
	O False	
	True	
	○ Correct	
	Exactly!	

Orrect
That's right!
